Subject Index

Acid sites
Properties and applications of boron-containing pentasil type zeolites 111

Acid sites
Aromatization of ethane on platinum containing ZSM-5 zeolites 37

Acid sites
Acid catalysed condensation of methyl N-phenylcarbamate 11

Acid sites
Gas oil cracking at the zeolite–matrix interface 247

Acidity
Interaction of zeolite alumina with matrix silica in catalytic cracking catalysts 45

Adsorption
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99

Adsorption
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283

Adsorption
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219

Adsorption
Coated silica as support for platinum catalyst. II. Hydrogen chemisorption and activity for combustion 235

Ageing
Selective hydrogenation of propyne over an ion-exchanged copper on silica catalyst 199

Ageing
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219

Ageing
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191

Ageing
Catalytic combustion of methane over supported palladium catalysts. II. Support and possible morphological effects 359

Ageing
Catalytic combustion of methane over supported palladium catalysts. I. Alumina supported catalysts 337

Ageing
Transformations of n-hexane of EuroPt-1 at low conversions 301

Aldehyde
Sulfided group VIII metals for hydroformylation L1

Alkyne hydrogenation
Selective hydrogenation of propyne over an ion-exchanged copper on silica catalyst 199

Alumina
Pressure changes during unsteady-state diffusion of gases in porous catalyst pellets: an experimental study 209

Aromatics
Transformation of C_8 aromatics on platinum, palladium and nickel supported on ZSM-5 1

Bismuth
Selective oxidation of isobutene over bismuth molybdate catalyst 383

Boroaluminosilicates
Properties and applications of boron-containing pentasil type zeolites 111

Boron trifluoride
$BF_3.H_3PO_4$ catalyst preparation and use in the alkylation of naphthalene with propene 25

Carbon deposition
High-resolution electron microscopy study of the carbon deposit morphology on nickel catalysts 133

Carbon monoxide
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99

Carbon monoxide hydrogenation
Hydrogenation of carbon monoxide over cobalt–nickel alloy catalyst supported on MnO–ZrO_2 mixed oxide 267

Carbon monoxide hydrogenation
Selectivities in carbon monoxide hydrogenation on rhodium catalysts as a function of surface reaction rate constants 59

Carbon tetrachloride
Infrared spectroscopic study of adsorption of phosgene and carbon tetrachloride on zeolites: Fermi resonance L7

Catalyst characterization (Adsorption, IR, NMR)

Interaction of zeolite alumina with matrix silica in catalytic cracking catalysts 45
Catalyst characterization (chromatography)
Chromatographic determination of effective diffusivities of Raschig ring-shaped catalyst: Radial anisotropy of pellets 167
Catalyst characterization (electrochemical polarization)
Reduction of propionitrile to propionaldehyde on supported palladium catalysts. II. Optimum in selectivity 91
Catalyst characterization (HREM)
High-resolution electron microscopy study of the carbon deposit morphology on nickel catalysts 133
Catalyst characterization (hydrogen–oxygen titration)
Coated silica as support for platinum catalyst. II. Hydrogen chemisorption and activity for combustion 235
Catalyst characterization (IR, TPR, XPS, XRD)
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219
Catalyst characterization (IR, XPS, XRD)
Effect of the method of preparation on the activity of nickel–Kieselguhr catalyst for vegetable oil hydrogenation 73
Catalyst characterization (IR)
Infrared spectroscopic study of adsorption of phosgene and carbon tetrachloride on zeolites: Fermi resonance L7
Catalyst characterization (MAS NMR, TPD, XRD)
Properties and applications of boron-containing pentasil type zeolites 111
Catalyst characterization (SEM/EDX, TPD, XRD)
Hydrogenation of carbon monoxide over cobalt–nickel alloy catalyst supported on MnO–ZrO_2 mixed oxide 267
Catalyst characterization (SIMS, XPS, XRD)
Catalytic oxidation of toluene over V_2O_5–WO_3 catalysts 149
Catalyst characterization (TPD)
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99
Catalyst characterization (TPR)
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Catalyst characterization (XPS, XRD)
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319
Catalyst characterization (XPS)
Transformations of n-hexane of EuroPt-1 at low conversions 301
Catalyst characterization (XRD)
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Catalyst preparation (coated support)
Coated silica as support for platinum catalyst. II. Hydrogen chemisorption and activity for combustion 235
Catalyst preparation (hydrothermal)
Properties and applications of boron-containing pentasil type zeolites 111
Catalyst preparation (impregnation, basis adsorption, deposition–precipitation)
Effect of the method of preparation on the activity of nickel–Kieselguhr catalyst for vegetable oil hydrogenation 73
Catalyst preparation (impregnation)
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219
Catalyst preparation (impregnation)
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Catalyst preparation (incipient wetness)
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Catalyst preparation (liquid saturation)
$BF_3.H_3PO_4$ catalyst preparation and use in the alkylation of naphthalene with propene 25
Cobalt
Soot oxidation on supported catalysts: Effects of pretreatment at high temperature L11
Cobalt–nickel
Hydrogenation of carbon monoxide over cobalt–nickel alloy catalyst supported on MnO–ZrO_2 mixed oxide 267
Coke deposition
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. I. Regeneration of precoked catalysts 181
Coke formation
High-resolution electron microscopy study of the carbon deposit morphology on nickel catalysts 133

Coke formation
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191
Coke formation
Transformations of n-hexane of EuroPt-1 at low conversions 301
Coke formation
Selective hydrogenation of propyne over an ion-exchanged copper on silica catalyst 199
Coke formation
Gas oil cracking at the zeolite–matrix interface 247
Combustion
Coated silica as support for platinum catalyst. II. Hydrogen chemisorption and activity for combustion 235
Complex catalysts
Carboxylic acid transvinylation as catalysed by complexes of palladium acetate with phenanthroline-like ligands 123
Copper/silica
Selective hydrogenation of propyne over an ion-exchanged copper on silica catalyst 199
Coronene
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191
Cracking
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Cracking
Properties and applications of boron-containing pentasil type zeolites 111
Cracking catalysts
Gas oil cracking at the zeolite–matrix interface 247
Cyclization
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Dehydrogenation
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Diffusion
Chromatographic determination of effective diffusivities of Raschig ring-shaped catalyst: Radial anisotropy of pellets 167
Diffusion of gases
Pressure changes during unsteady-state diffusion of gases in porous catalyst pellets: an experimental study 209
Ethane conversion
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Ethene
Sulfided group VIII metals for hydroformylation L1
EuroPt-1
Transformations of n-hexane of EuroPt-1 at low conversions 301
EuroPt-1
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319
Exhaust
Soot oxidation on supported catalysts: Effects of pretreatment at high temperature L11
Extraframework aluminium
Interaction of zeolite alumina with matrix silica in catalytic cracking catalysts 45
Fermi resonance
Infrared spectroscopic study of adsorption of phosgene and carbon tetrachloride on zeolites: Fermi resonance L7
Formaldehyde
Acid catalysed condensation of methyl N-phenylcarbamate 11
Gas oil
Gas oil cracking at the zeolite–matrix interface 247
Hexane skeletal reactions
Transformations of n-hexane of EuroPt-1 at low conversions 301
Hydroconversion
Properties and applications of boron-containing pentasil type zeolites 111
Hydrodenitrogenation
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257
Hydroformylation
Sulfided group VIII metals for hydroformylation L1
Hydrogen removal
Mechanism of sulfur poisoning of supported Pd(Pt)/Al_2O_3 catalysts for H_2–O_2 reaction 219
Hydrogen treatment

Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. I. Regeneration of precoked catalysts 181
Hydrogen treatment
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191
Hydrotreating catalysts
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257
Iridium
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191
Iridium
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. I. Regeneration of precoked catalysts 181
Iron/alumina
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99
Isobutene oxidation
Selective oxidation of isobutene over bismuth molybdate catalyst 383
Isopropylnaphthalene
$BF_3.H_3PO_4$ catalyst preparation and use in the alkylation of naphthalene with propene 25
Kinetics
Catalytic combustion of methane over supported palladium catalysts. I. Alumina supported catalysts 337
Kinetics
Catalytic combustion of methane over supported palladium catalysts. II. Support and possible morphological effects 359
Kinetics
Selective hydrogenation of propyne over an ion-exchanged copper on silica catalyst 199
Kinetics
Gas oil cracking at the zeolite–matrix interface 247
Kinetics
Selective oxidation of isobutene over bismuth molybdate catalyst 383
Kinetics
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257
Kinetics
$BF_3.H_3PO_4$ catalyst preparation and use in the alkylation of naphthalene with propene 25
Kinetics
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319
Matrix interaction
Gas oil cracking at the zeolite–matrix interface 247
Metal ion poisoning
Reduction of propionitrile to propionaldehyde on supported palladium catalysts. II. Optimum in selectivity 91
Methacrolein
Selective oxidation of isobutene over bismuth molybdate catalyst 383
Methanation
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99
Methanation sites
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Methane combustion
Catalytic combustion of methane over supported palladium catalysts. II. Support and possible morphological effects 359
Methane combustion
Coated silica as support for platinum catalyst. II. Hydrogen chemisorption and activity for combustion 235
Methane oxidation
Catalytic combustion of methane over supported palladium catalysts. I. Alumina supported catalysts 337
Methoxy
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Methyl-N-phenylcarbamate condensation
Acid catalysed condensation of methyl N-phenylcarbamate 11
Methylcyclopentane
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319
Molybdate
Selective oxidation of isobutene over bismuth molybdate catalyst 383
Morphology

Catalytic combustion of methane over supported palladium catalysts. II. Support and possible morphological effects 359
Naphthalene alkylation
$BF_3.H_3PO_4$ catalyst preparation and use in the alkylation of naphthalene with propene 25
Nickel
Transformation of C_8 aromatics on platinum, palladium and nickel supported on ZSM-5 1
Nickel
High-resolution electron microscopy study of the carbon deposit morphology on nickel catalysts 133
Nickel/alumina
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Nickel sulphide
Sulfided group VIII metals for hydroformylation L1
Nickel–Kieselguhr
Effect of the method of preparation on the activity of nickel–Kieselguhr catalyst for vegetable oil hydrogenation 73
Nickel–molybdenum
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257
Nickel–tungsten
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257
Oligomerization
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Palladium
Transformation of C_8 aromatics on platinum, palladium and nickel supported on ZSM-5 1
Palladium acetate
Carboxylic acid transvinylation as catalysed by complexes of palladium acetate with phenanthroline-like ligands 123
Palladium/alumina
Catalytic combustion of methane over supported palladium catalysts. II. Support and possible morphological effects 359
Palladium/alumina
Catalytic combustion of methane over supported palladium catalysts. I. Alumina supported catalysts 337
Palladium/carbon
Reduction of propionitrile to propionaldehyde on supported palladium catalysts. II. Optimum in selectivity 91
Palladium/silica
Catalytic combustion of methane over supported palladium catalysts. II. Support and possible morphological effects 359
Palladium–platinum/alumina
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219
Pentasil type
Properties and applications of boron-containing pentasil type zeolites 111
Phenanthroline
Carboxylic acid transvinylation as catalysed by complexes of palladium acetate with phenanthroline-like ligands 123
Phosgene
Infrared spectroscopic study of adsorption of phosgene and carbon tetrachloride on zeolites: Fermi resonance L7
Platinum
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. I. Regeneration of precoked catalysts 181
Platinum
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Platinum
Transformation of C_8 aromatics on platinum, palladium and nickel supported on ZSM-5 1
Platinum
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191
Platinum/silica
Transformations of n-hexane of EuroPt-1 at low conversions 301
Platinum/silica
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319
Platinum/silica
Coated silica as support for platinum catalyst. II. Hydrogen chemisorption and activity for combustion 235
Poisoning mechanism

Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219

Pore structure
Pressure changes during unsteady-state diffusion of gases in porous catalyst pellets: an experimental study 209

Porous alumina
Chromatographic determination of effective diffusivities of Raschig ring-shaped catalyst: Radial anisotropy of pellets 167

Propionaldehyde
Sulfided group VIII metals for hydroformylation L1

Propionitrile transformation
Reduction of propionitrile to propionaldehyde on supported palladium catalysts. II. Optimum in selectivity 91

Purification
Reduction of propionitrile to propionaldehyde on supported palladium catalysts. II. Optimum in selectivity 91

Pyridine
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257

Pyrrole
Kinetic study of pyrrole and pyridine HDN on Ni–W and Ni–Mo catalysts 257

Raschig ring
Chromatographic determination of effective diffusivities of Raschig ring-shaped catalyst: Radial anisotropy of pellets 167

Redox model
Selective oxidation of isobutene over bismuth molybdate catalyst 383

Regeneration
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219

Regeneration
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. I. Regeneration of precoked catalysts 181

Regeneration
Transformations of n-hexane of EuroPt-1 at low conversions 301

Regeneration
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191

Rhenium
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. I. Regeneration of precoked catalysts 181

Rhenium
Regeneration by hydrogen treatment of bifunctional catalysts deactivated by coke deposition. II. Regeneration of catalysts impregnated by coronene 191

Rhodium
Selectivities in carbon monoxide hydrogenation on rhodium catalysts as a function of surface reaction rate constants 59

Ring opening
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319

Selectivity (aromatics)
Aromatization of ethane on platinum containing ZSM-5 zeolites 37

Selectivity (benzaldehyde)
Catalytic oxidation of toluene over V_2O_5–WO_3 catalysts 149

Selectivity (C_2 oxygenates)
Selectivities in carbon monoxide hydrogenation on rhodium catalysts as a function of surface reaction rate constants 59

Selectivity (gasoline)
Gas oil cracking at the zeolite–matrix interface 247

Selectivity (gasoline)
Hydrogenation of carbon monoxide over cobalt–nickel alloy catalyst supported on MnO–ZrO_2 mixed oxide 267

Selectivity (methylene diphenyl diurethane)
Acid catalysed condensation of methyl N-phenylcarbamate 11

Selectivity (propene)
Selective hydrogenation of propyne over an ion-exchanged copper on silica catalyst 199

Selectivity (propionaldehyde)
Reduction of propionitrile to propionaldehyde on supported palladium catalysts. II. Optimum in selectivity 91

Selectivity (vinylation)
Carboxylic acid transvinylation as catalysed by complexes of palladium acetate with phenanthroline-like ligands 123

Selectivity (xylene)
Properties and applications of boron-containing pentasil type zeolites 111
Sintering
Gas oil cracking at the zeolite–matrix interface 247
Soot oxidation
Soot oxidation on supported catalysts: Effects of pretreatment at high temperature L11
Spillover
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Spillover
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Steam treatment
Interaction of zeolite alumina with matrix silica in catalytic cracking catalysts 45
Steam treatment
Gas oil cracking at the zeolite–matrix interface 247
Sulphided group VIII metals
Sulfided group VIII metals for hydroformylation L1
Sulphur poisoning
Mechanism of sulfur poisoning of supported $Pd(Pt)/Al_2O_3$ catalysts for H_2–O_2 reaction 219
Sulphuric acid catalysts
Acid catalysed condensation of methyl N-phenylcarbamate 11
Surface changes
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99
Surface composition
EuroPt-1 after various pretreatments: structure, surface composition and catalytic activity in methylcyclopentane reactions 319
Surface reaction rate
Selectivities in carbon monoxide hydrogenation on rhodium catalysts as a function of surface reaction rate constants 59
Syngas conversion
Methanation sites on a low loading Ni/Al_2O_3 catalyst 283
Syngas conversion
Sulfided group VIII metals for hydroformylation L1
Syngas conversion
Changes of the metallic surface of Fe/Al_2O_3 during exposure to CO/He and CO/H_2 99
Syngas conversion
Selectivities in carbon monoxide hydrogenation on rhodium catalysts as a function of surface reaction rate constants 59
Syngas conversion
Hydrogenation of carbon monoxide over cobalt–nickel alloy catalyst supported on MnO–ZrO_2 mixed oxide 267
Toluene oxidation
Catalytic oxidation of toluene over V_2O_5–WO_3 catalysts 149
Transvinylation
Carboxylic acid transvinylation as catalysed by complexes of palladium acetate with phenanthroline-like ligands 123
Trifluoroacetic acid catalysts
Acid catalysed condensation of methyl N-phenylcarbamate 11
Unsteady state processes
Pressure changes during unsteady-state diffusion of gases in porous catalyst pellets: an experimental study 209
Vanadia–tungsten oxide
Catalytic oxidation of toluene over V_2O_5–WO_3 catalysts 149
Vegetable oil hydrogenation
Effect of the method of preparation on the activity of nickel–Kieselguhr catalyst for vegetable oil hydrogenation 73
Vinylation
Carboxylic acid transvinylation as catalysed by complexes of palladium acetate with phenanthroline-like ligands 123
Xylenes
Transformation of C_8 aromatics on platinum, palladium and nickel supported on ZSM-5 1
Zeolites
Gas oil cracking at the zeolite–matrix interface 247
Zeolites
Infrared spectroscopic study of adsorption of phosgene and carbon tetrachloride on zeolites: Fermi resonance L7
Zeolites
Transformation of C_8 aromatics on platinum, palladium and nickel supported on ZSM-5 1
Zeolites

Properties and applications of boron-containing pentasil type zeolites 111
Zeolites
Aromatization of ethane on platinum containing ZSM-5 zeolites 37
Zeolites
Interaction of zeolite alumina with matrix silica in catalytic cracking catalysts 45
